

Cleaning Off Tips

All the face paints we use are water based and gentle on the skin. To wash them off, simply use some warm water and a mild soap. Make sure to always wash off any face paint before you go to sleep, as the longer you leave it on, the harder it is to wash off. Never vigorously try to rub off the face paint, as you will rub it into the pores, making it harder to wash off completely.

Some colours that are very high in pigment might temporarily stain the skin slightly. To wash off any stubborn colours you can follow the below steps:

- Use a face cloth with some warm water and a mild soap or a baby wipe to wash off most of the paint.
- Use make-up remover around any sensitive parts, like around the eyes or the corners of the mouth.
- If there is still some slight staining left, moisturise the area and leave for a few minutes.
- Finally just exfoliate with a mild lotion and a cloth, you can mix some sugar in with the lotion for a lovely and safe scrub.
